Revitin Oral Therapy Toothpaste for Cancer Patients

I was contacted by C.S. Bioscience, who has made Revitin Oral therapy toothpaste a few years ago. It's only been available to consumers through dentists but now a new website has launched and consumers have the opportunity to buy it online. The toothpaste has helped people going through chemotherapy because of its healing powers for mouth sores. It helps to stop gums from bleeding, decay, sensitivity and many other

mouth and throat disorders and diseases faced by millions of Americans. It also whitens teeth and freshens breath. Their goal is to educate people that toothpastes that promise to just whiten teeth and freshen breath are not the only solutions for balanced oral health and that excellent oral health is so important to overall health. Revitin does not come with a poison label, as many other toothpastes do, and it helps to heal and not irritate like other pastes.

This toothpaste has already been featured in beauty magazines and on Fox5. One of the dentists behind it has been on Dr. Oz and Martha Stewart. Here's a testimonial below:

Testimonial from Maria in California:

Vicki Tashman @PinkLinkVicki RT @J2Novack: There's another side to the Amy Robach breast cancer story... RT @KomenNebraska: Another side to the Amy Robach story. post by @ganyschwitzer w/comments by @DrSusanLove #bcm #cancer
